13:04 1-Feb-2022	SJAM		SJAM: two bobtails blocking inside lane, feel like they can't trust the police and that they're being lied to. PLT assured them that the reason we would like them to move, is so that laneways are to be opened up for through traffic / emergency vehicles. Two bobtails agreed to move (PLT gave detailed map brief, and the drivers had agreed to be lead to the new spots – on Queen street at Bay). PLT heard from the other truckers on SJAM, that once the two bobtails move out, that the other trucks will just fill the spots. PLT pulled out. Two lead bobtails are following direction from "R" (REDACTED)	Bach (#2519)	Communication	
11:57 1-Feb-2022	SJAM/ Booth		Spoke with Chris BARBER – on scene at SJAM / Booth. 2 problem trucks willing to move how we want to be "closer to the action". BARBER said biggest problem and main priority is to get fuel to his trucks. "There are cabs with babies that are going to run out of fuel". BARBER states: I prefer the slip tanks with	Bach (#2519)	Communication

15:29 7-Feb-2022	Rideau St / Sussex Dr		tomorrow. This is a guarantee from the group. Same group as Rideau/Sussex. We have been in talks since this morning rebuilding relationships with the organizers. We met with the block captain at the corner of Sussex and Rideau St; they are open to moving to a different location but in downtown core. Also concerned that once they start moving it is a trick by police. We then met with the convoy leader and spoke of maybe helping us move the trucks to a different from Sussex and Rideau St. He met with the block captain. He came down and looked at the location and he asked that we come back with some options where we could put them. One option we tighten up Wellington St in front of Parliament between Lyon to Elgin St. We need to come up with two other options to bring to them and they are willing to move once we have a plan and also we have been told if police have further enforcement to either remove truckers from intersections or jerry cans they are considering airport complete lockdown and also 417 highway. Also they are open to only honking their horns once a day for 5 minutes in the late afternoon if they get a meeting with the city.	Lamarche (#1758)	Communication

People are pissed. That will cause huge problems if you follow through with that.	Blonde (#2188)	Communication	

			We worked hard to respect the no fuel request over the weekend but the feeling is the police did not hold up their end by making this threat. I'm getting messages from people back home and abroad. They are all telling me they will come and face the charges to get the fuel in. I was given a link to spread of a group of lawyers out of Europe who will fight all charges for free. All hands are on deck now to fuel as many of the trucks as possible. If you do this things will escalate unnecessarily. I got a call after this news spread of a millionaire who owns a fleet of trucks with skip tanks whose staff are all prepared to face the charges to get the fuel in. Please don't do this, for everyone's sake. You know as well as I do that this is unlike any protest our nation has seen. It is peaceful, respectful and we are literally feeding as much info to the police as possible. We are not criminals. I think you know this. I know its not you but please pass this along. We all want this to stay peaceful. Following message was sent in response to REDA: I understand your frustration RED. I've been asked to advise you that arrests will be made for those transporting fuel for aiding and abetting the Criminal Code violation of Mischief PLT Update – spoke with RED REDACTE. 			Spoke to REDACTED REDACTED Lot is being slowly taken over by convoy demonstrators in this area. Setting up tents and trailers to support their living in the nearby trucks. Owner wants these moved off his lot as he currently cannot operate it normally as it should be paid parking. Not sending his private enforcement at this point given the situation. Does not want the porta potties installed. Firm on this. Otherwise understanding that police aren't moving on these areas to clear out at this point. Would like enforcement to attend when able to under trespass act. 23:00 29-Jan-2022	SJAM / Booth		BC Convoy	At about 2300 the trucks at SJAM/Booth started to get highly highly irritated and started revving their engines enough so that the heavy equipment operator and the assigned cruiser pulled back a little until it deescalated. They the proceeded to offer the heavy equipment guy \$5000 to move his truck to let them through. (he did not accept). About an hour later Danny Bulfor (the ex ERT RCMP) approached an officer with some questions that he was not able to answer so the contact info was forwarded to me for follow up. I asked Staff Frost to go speak to Danny (at that time I only knew that a Danny was inquiring-no other details). Danny indicated that there was a high level of irritation from this BC group because they drove all the way here and had to be parked so far away. Danny thinks if we could do something to arrange to get some up there it might de-escalate things a bit. Danny indicated that their convoy Command Post is located at the Swiss Inn on Daly street. Danny identified his role as planning and logistics guy. Staff Frost engaged Danny about what the Bearhug entailed. Essentially they are going to envelope the area with trucks and not move, this creates a big 'bearhug' and a great deal of traffic gridlock would be the goal.		McKenna (#1562)	Communication

When PLT called him he advised that his executive board were all together REDACTED at the Ark hotel which he advised was the "Command Center". He's attempting to convince Police to join his executive team for a "risk mitigation meeting" (in his words) with NCR Police Services. 			By the attached photos from our CCTV system, you will see that Tamara Lich and three others visited our church this afternoon at 3:45pm. Our concern, now, with the increased police action is that some of the protestors will attempt to shelter and claim sanctuary in our church. That being the case, effective immediately, we are closing the church until further notice. Therefore, if anyone should come to any of the "Red Zone Checkpoints" saying that they are coming to St. Patrick's for mass, your officers can advise them that the church is closed and they can return home. Two of our properties staff – RE REDA and RED RED, will likely report for work, for at least some hours, on most days. 			Bank St south of Laurier last night after organizers told them to clear out. RE reported that this group left the city and are positioned roughly an hour out of town. RE is very conflicted. In one sentence he says he's not going anywhere and then in the next sentence he talks about leaving and flying home. RE is becoming more frustrated by what he described as a lack of direction from organizers. Despite his frustration, RE is still regularly attending meetings with organizers. RE attended Bank St and Slater St to speak with remaining occupants and address intersection safety concerns. With RE 's assistance, PLT officers were able to move a vehicle from the intersection in an effort to improve the sight line of the north / south pedestrian crosswalk.

REDACTED called and advised me he had spoken with **REDACTED** and he had agreed to leave parking lot by tomorrow. **REDACTED** stated he did not want to involve police if he did not have to and was hopeful that group would leave on their own. Stated he would contact PLT if group does not move and refuses to vacate

BARBER reached out and asked if they could move 6-7 trucks off Bank St (at Albert St) and move them to Wellington. BARBER was informed that the trucks can leave, however they cannot reposition on Wellington.

Phone call with BARBER – saying he had only been trying to help us out, by clearing up the side streets and filling up Wellington St (as per original intent and optics). These trucks have no intention of leaving, and will stay where they are. He reiterated that “the world is watching the police, especially after last Sunday’s stunt”. BARBER warned that if police attempt to move in riot gear, that it would be a big mistake.

He maintains his original stance, saying that the only way they leave is if JT recognizes that they’re here and if the mandates are lifted.

BARBER made mention to rumours that are going around that there is a convoy coming in from Kenora (unknown numbers)

At about 12:12, PLT were flagged down to assist with a situation occurring at Albert St / Bank St.

QRT officer formed grounds for fuel mischief charge / arrest. Crowd had quickly formed and was agitated.

PLT assessed the situation and determined that it was not a PLT matter.

However, due to growing of crowd and officer safety, PLT remained on scene. Multiple children observed carrying fuel cans with “Freedom” written on them.

13:08 9-Feb-2022	Queen / Kent	Attended parking lot at Queen & Kent. Spoke with male named "REDA" who identified himself as the organizer or demonstrators in the parking lot. Stated he had spoken with property manager of parking lot and had been given permission to stay as long as they stayed to one area of the lot. Refused to provide property manager's information to PLT. PLT obtained phone number for property manager from another officer. Contacted property manager who advised he had been in contact with "REDA" and had said they could stay in the lot as long as they stayed to the west side of the lot and kept things clean. Property manager advised he allowed demonstrators to stay to try and keep the peace and he was afraid that asking them to leave would result in damage being done to the parking lot and their building across the street at 112 Kent. Property manager advised if he wished for police assistance in having demonstrators removed from the lot he would need to issue a letter asking them to leave. Advised PLT would attempt to assist in serving letters if needed. Stated he would get back to PLT regarding what their plan was. "REDA" advised of conversation with property manager and got very upset. Believed police were coaxing property manager in to having demonstrators removed. PLT approached by male who identified himself as "REDA". Stated he was involved with demonstrators in parking lot. Much easier to speak with than "REDA". Advised he believes that if PLT could facilitate move from lot to Wellington it would be well received and move could be facilitated. PLT contact info left with "REDA" and "REDA". RED is here from Toronto, he is a heavy tow truck driver. He is here on his own and not funded and not affiliated with any convoy. He is anti vax and anti mandate. RED is the self-proclaimed block leader. RED identified himself to RED and explained that he is a convoy leader and involved in the strategy, logistics and communications with regard to the convoy. RED voiced his concerns with having the emergency lane blocked (subsequently affecting church services) and asked for the trucks to move. RED then had to leave due to a meeting with city members taking place at 11. RED understands the necessity for the emergency lane and feels remorse for already affecting church services. He is willing to work with police in order to open the west, curb side lane, however RED will wait for RED and his "higher ups" to confirm this plan before any movement takes place (RED expressed a distrust with the police and cited the 'coventry' incident as well as cutting off fuel supplies – arresting people with jerry cans). RED and his block have no intentions of leaving the city anytime soon and boasted that they have fuel and supplies for days ("they have become a family"). RED also stated that he has absolutely no affiliation with Pat KING. 			convoy group was having doctors speak that afternoon. RE indicated that there are currently meetings taking place on site with their lawyers and doctors. Plt updated RE in regards to the group at Confederation Park and that after a meeting between group leaders and the delegation from the Algonquin host Nation, the group was to put out all fires, not conduct any further ceremonies, not erect any tipis, remove the wooden structure, and return the land to the way it was prior to their arrival. Plt had just attended Confederation Park and observed that none of these tasks had been started. RE advised the convoy leadership has cut ties with James Bauder and Pat King and that they do not support James Bauder or Pat King who have been tied to that group. RE advised that King had been used by the group early to help gain support and momentum. RE was currently on his way to patrol the area and try to ensure that emergency routes are staying open and truckers are complying with the group's plans. He admitted it was frustrating at times because not all truckers were cooperating with their requests and referred to the group of trucks on Rideau St in addition to a few independent truckers mixed throughout. He advised more than 80% are good and that they have daily meetings and have identified 35 Block Captains to assist with delivering messaging and instruction. Leadership is constantly messaging to keep emergency routes open and they make regular patrols of the area to ensure compliance. Plt questioned RE about the core leadership of the group and he advised it was made up of 3-5 individuals which he was a part of and that Tom Marazzo is and always has been the leader. During the conversation RE advised the group wants to get portable toilets into the area and that they had some lined up and ready to go but were not allowed to bring them in. He advised they are not allowed to have current portable toilets pumped and that people, including families with children are defecating in buckets. He advised he would ideally like to bring in 6 portable toilet units on trailers but would be willing to settle for 3 and that they would need to be maintained every 48hrs.

			RE provided a list of locations he would like them positioned but agreed for OPS Plt to suggest alternative locations due to access if required. Plt also questioned RE as to what the group would like to achieve from the demonstration. At that time he advised he would like RE to meet with the group and their doctors. He also advised they would like an opportunity to meet with Trudeau and for all Covid mandates to be gone. Plt Wierbicki and OPS Plt Carvalho then had a separate meeting with Tom Marazzo. Marazzo advised that ultimately the group wants all of the Covid mandates gone. He also advised that they want the Trudeau removed as head of the Liberal Party similar to the way Erin O'Toole was recently removed from the Conservative Party. Marazzo advised many of the truckers are committed and feel as if they couldn't leave even if they wanted to because they are not only representing themselves but their communities as well. He advised they are upset with Chief Sloy's messaging and his comments that they don't believe he is to committed keeping things peaceful. Marazzo advised that they have daily meetings with the group and are consistently messaging to keep things peaceful and to cooperate with the police. They are not happy with the way they are being portrayed in the media when they are reporting crimes and arrests. Marazzo advised that every truck has a camera and many of the truckers are wearing body cameras. They have been given direction to document and release any report criminal activity that is observed, and are prepared to counter any media claims suggesting that their group was involved in some way. The group is still committed to keeping any interactions with police positive event though the police have not been willing to negotiate or give them anything and used the toilets as an example. They are looking for a way to coexist with the city while they are here demonstrating as they recognize it may be months and are making it a

			priority to open and maintain emergency lanes and keep them open. They are committed to keeping things peaceful and safe and advised they are willing to assist with the removal of any individuals or groups the police identify as causing problems. Marazzo also referenced the fact that they have lawyers and doctors that are supporting them and advised they have two of the world's top scientist's here to speak and provide data to back up their arguments. Marazzo also advised that Tamara Lich has moved hotels to an undisclosed location as she has been receiving threats and is not dealing well with her newfound notoriety and fame. Plt observed Tamara enter the hotel during their meeting. Both REF and Marazzo have agreed to keep the lines of communication open and to speak with Plt daily as required.

Multiple sources in my Dr friend's patriot intel network in both Ontario and DC have confirmed that AT LEAST 15 ARMED INFILTRATORS have been contracted to mingle in to the Trucker Crowd and beginning shouting down police then opening fire upon them. 			RCMP and other security personnel. The goal of this is for Trudeau and Biden BOTH to be able to “confirm” their scripted rhetoric that this is nothing but “FRINGE EXTREMISTS” – exactly like the January 6 U.S. Capitol rioters. I am confident you are already aware of this – and are doing your best to neutralize this. Just keep in mind that these people DO NOT PLAY FAIR – and will do anything to keep the masses under false control. Perhaps the best play is to hold a pre-emptive press conference and announce the possibilities. Unknown where she got the information from . 08:38 31-Jan-2022	Golden Lake			PLT received a letter from REDACTED of REDACTED FN(Golden Lake) from REDACTED – the Anishinabek Nation Grand Council Chief stating that the Anishinabek stating the importance of vaccination and mandates in place to ensure the safety of their communities. He also noted the use of social media to try to garner support from Indigenous communities – which has been proven to be inaccurate. See portion of letter below: This convoy has been travelling throughout Anishinabek territories over the past week with coverage saturating social and mainstream media. We are very concerned with the delivery of their collective messaging, as it is often not cited or from dubious sources. This creates the likelihood for misinformation and inaccurate or harmful information to be transmitted to others as fact. For instance, earlier this week, supporters of this movement posted a ceremonial video from the Frog Lake First Nation on a private social media platform, claiming it to be an Algonquin gathering of support for their movement. This is insulting and harmful to the community of Frog Lake and the Cree Nation and has a negative impact on their cultural safety, because the video was in fact of an honour ceremony for an Elder who is now in the Spirit world. Furthermore, they have requested drums and ceremonial items be brought to their gatherings along the way without protocol for what appears to be appropriation of our people. This and other behaviours demonstrated by these protestors and their supporters is very concerning to the safety of our citizens and communities as there is high indication that this 'Freedom' Convoy is rooted in racist ideology similar to the US Capitol Riot in Jan 2021. The movement does not respect our sovereignty and safety as Nations, our history, or our culture.	Lott (OPP)	OPP Information

RED then stated “the native fire keeper expressed that we were in prayer for the lost children that are being dug up everyday and our spiritual rights were being trampled upon”. 15:26 10-Feb-2022			PLT update – spoke with REDACTE. Advised he has been emboldened by support from those in Ottawa and back home. Stated some anonymous donor dropped off 13k at his home last week to assist with his mortgage payment. He has no exit strategy. Stated he will leave when ALL mandates are removed across country. When asked about demonstrations across country he smiled and stated he wanted the whole country to come to an economic stand still. Stated he had no sympathy for any drivers still working as they are not part of the movement. REDACTE has constructed a large wooden platform on top of the “hut” on the back of his truck. 15:04 8-Feb-2022				James Bauder and RED REDA 1415hrs spoke with BARBER, he confirmed he had moved his truck out of the city (only his truck) and that he is currently on route to a "secret location" outside the city. He explained that he's going to check in on some truckers (to 'show face') that have been stuck outside of the action. BARBER will start to coordinate small, rolling convoys throughout the city daily IOT have more active protests, and that he still wants some trucks to move out from the downtown core, side streets (leaving trucks on Wellington) and to reposition outside the city and join in on rolling convoys. BARBER said he will keep the police apprised of a number of trucks and routes. BARBER recognized that they will still be subject to the HTA. BARBER then said that they are not leaving the city anytime soon, and that they haven't been heard and that there is only one solution: acknowledgement, leadership and action from the PM. He also said that they have about "3000 trucks ready to stand up on a moments notice". BARBER extremely upset with what took place Sunday night at Coventry	Bach (#2519)	Communication

Said things were going well in Ottawa although they called OPS for an individual that was not following the rules of engagement and seemed to have mental issues. OPS attended and were able to solve the issue. She said that they kept up on safety messaging to their protesters. Efforts for safety is a priority. She confirmed that police could communicate with them. Said the messaging about police not being able to talk to them was a misunderstanding. She asked about the social media post by OPS where anyone found bringing fuel or goods could be arrested. She was advised that this was put out by OPS and that was being discussed. That police would use discretion. She said that this was illegal and that they would bring this to their lawyer. Making no sense as people have a right to eat and stay warm. JOHNSON also expressed concern of rumours that demonstrators have been sharing the plaintiff REDA's contact information and discussed taking actions against her. No specification was given as to what action that would be From JOHNSON: I should flag that we've been hearing from people going around to hand out the release that some truckers believe that the lawyer representing LICH, BARBER and DICHTER is also representing all the truckers. 11:38 6-Feb-2022		At 10:31hrs Plt Wierzbicki spoke with Tom Marazzo who thanked Plt for facilitating the meeting yesterday between them and OPS Plt Carvalho. Marazzo advised that they are trying to come up with a strategy to deal with the increased traffic and people attending the area on the weekend. They recognize there is an increase for risk and are hoping the position of the police response thus far does not change after the weekend. He indicated the majority of their group is following their direction in regards to horn honking etc. with the exception of a few individuals. He further advised that the direction today is that there will be no horn honking until 1pm so as not to interfere with ongoing church services in the area. They are working on a strategy to control the situation better as well as a strategy to take some pressure off of OPS Chief Sloly with an emphasis on public safety. Morazzo advised they intend to provide a daily statement, but that it will not be like their previous press release with Tamara Lich and Dan Bulford. This messaging will likely be done internally via livestream and will be directed at how they can help the police. Morazzo also indicated that one of their doctors, REDACTED, would like to have a sit down conversation with Chief Sloly to explain the science behind the vaccinations and what is really happening. Plt advised they would forward the request to OPS to be passed up the chain of command. Plt brought up the delivery of the portable toilets which is scheduled to take place tonight. Morazzo was appreciative and advised he heard rumours that a group had placed a tent over a sewer on Wellington St last night and were using it as a toilet. Morazzo advised the plan for today is to open up the lanes on the roadways as discussed and to concentrate on getting through the weekend safely with the increase in traffic. 10:40 6-Feb-2022		BARBER messaged stating that he wants to start moving trucks beginning tomorrow, to staging areas (Coventry, and I recommended Bronson and Riverside). "Wellington will stay, and side streets are the priority" he said, due to safety concerns (an influx of protestors and pedestrians this weekend) it wouldn't be until tomorrow. Unfortunately, at this point BARBER recognizes that he has lost a lot of control (pull) over the majority of the truckers and passenger vehicles, however, he is focused on communicating the message to move out to staging areas. When asked about endstate, BARBER continues to say "we need answers. They have called us all names and then hid".	Bach (#2519)	Communication	
21:36 5-Feb-2022	East Coast Convoy	PLT Dubois was able to outreach with REDA REDACTE . He said that things were very busy today with the influx of supporters. Things were going well in his group. He was disappointed to hear that the Ottawa police board, at a public meeting, called them terrorists. Seemed distraught about that as he mentioned that those causing problems were individual outsiders and other groups with their own agenda. Reminded him that this was the risk of long and large protests. Said they had issues with RE and were starting to use a new software to improve communications between them. Did not know the name of the software. Encouraged him to keep communicating clear messaging among them. Emphasis on safety. REDA told their group at a meeting yesterday that he believed that they should talk to police for daily issues and not through lawyer and that he would continue talking to police. Said that they were having issues with not being able to maintain the porta-potties. Was going to address this with Ottawa PLT tomorrow as it was an urgent hygiene issue. He then went on to say that they want to continue working with the police and that their number one concern is safety, for both their truckers and citizens (then cited that his convoy members are fearful for their personal safety and that they've been subjected to acts of vandalism, mischief, threats / intimidation, etc). 			BARBER are on board with repositioning the majority of their trucks in a staging area, while maintaining optics at Parliament Hill. They estimate they have roughly 320 trucks, all spread out in the core. MARRAZO and BARBER still have not been able to engage the other factions of the demonstrators, they state they will attempt to build a relationship, in hopes to have them follow through with the repositioning of the trucks as well as opening up emergency lanes. It is still unknown the collective sentiment of other truckers (not in their convoy) in terms of police action; however, BARBER and MARRAZO will continue communicating the message of : peaceful, lawful, safe. Finally, BARBER and MARRAZO are concerned about the porta potties on Wellington, stating that they have not been emptied in days, and this is their focus, pointing out the massive influx of people coming in this weekend (to join and counter the demo). They also inquired about whether highway exits would be blocked coming in to the city. Waiting on BARBER to send the names of their convoy leads as well as where they are willing to “give”. They have also requested to speak to someone higher ranking than a Sgt

Both want to work with PLT to get “rogue” elements of convoy to fall in line and that they would have some sort of cohesion in the group. Neither was able to say if convoy members would support police actions against group at Confederation Park because they do not control the whole of everyone protesting. Stated end of demo for them looks like recognition and acknowledgement by PM. Rolling convoys to occur everyday at 1000hrs. 			removing their group as quickly from PH to avoid such regrettable incidents. He agreed with this. He heard rumours about the army getting ready and standing by in Petawawa. I reiterated our previous discussion about the media article from CBC and that the messaging was by the Chief in response to the media as the army being a possible option. His group sent out a media release at 1 p.m with a clear message that states their position. Wanted to let us know that today they gave \$7,000 of goods to the Shepherds of Good Hope and also \$800 of food from Costco and that this was important for him. I asked him about his feelings on safety. He said that he was worried as the "Arc Hotel", where he is staying, had received threats from possibly Antifa. He believes Antifa is angry at their group since they have been distancing themselves from them. Since RED is the one that called me I asked him about the fact that the group does not want police talking to them anymore and to negotiate with their lawyer instead. RED dismissed this saying that it made no sense and he was not on board with that idea. He believed that we needed to talk on a regular basis to make sure small and larger issues and situations can be addressed. He added that he was not the only one at the helm. That it was a group effort and that he was going to speak to the group about this. He added he would still call me and give me updates and/or share concerns and good things going on at the protest. He believed things were going well in the group and they are holding regular meetings. I asked him about if he had started to plan an exit strategy. Mentioned that they were going to plan and talk about this but did not have any idea of when and how yet. Don't really know how much weight RED has on the group as a whole. 			are the ones making the calls. Plt asked about how the snow was affecting things and Marazzo advised that there were no issues and that they have shovels and are taking care of themselves Marazzo advised he is done talking with OPS particularly Officers Lee Phong and Louis Carvalho. He advised that all they do is talk and make demands and that they don't listen. He believes they are treating the situation like a hostage negotiation. He was upset because yesterday he was told an OPS Inspector would be attending their CP yesterday and he requested to speak with the Inspector for 5 minutes alone away from any of his group or OPS Plt. He advised Plt Carvalho immediately said no and that if discussions were going to be had they would all be present and that an Inspector did not even attend. He advised he enjoys speaking with Plt Wierzbicki and looks forward to their daily call. Marazzo advised he is extremely well versed in negotiation and that he had an 18 year career in the Canadian Military and retired as an Engineer Officer in 2015 due to a medical release. After his release he returned to school and completed a 4 year software degree and went immediately into teaching but has since lost his job due to the mandates and advised that he "has skin in the game". He advised that they are just Canadian citizens that have come to deliver a message and that Canadians have already given them 10 million dollars to support them. Marazzo wanted to make it clear that Police on Guard for Thee re not running this event as he has seen SM posts advising that they are running the CP. He advised he himself is a member and that they are good people but that he is just a member of an online club and they are not running the event. 			responding to questions from Mayor and council about the demonstration and advised that all options are on the table. Marazzo advised he work in Toronto in the military HQ for domestic matters and that only the Premier can request the military to assist. He was also upset that during the police update they advised there are 14 active investigations but did not clarify whether they involved truckers or not. Also that when they spoke about reports involving a gun they did not report that it was the truckers who reported it. Marazzo advised right now he is trying to get fuel to trucks on Wellington St as there are families with kids homeschooling there and that he also wants to get the portable toilets unpmed but that police are not allowing them to do so. The group also has trailers with heated toilets available but they were told they do not have permits and are not allowed to bring them in. He understands what the police are trying to do but advised it is not working, the group is not going anywhere, and that it is not going to be nice when everyone starts defecating on the ground. As of last night the group has agreed not to blow their air horns from 7pm-8am but he acknowledge there still may be the odd one off. He also advised there is a psychiatrist office next door who reached out and requested they don't blow the air horns this morning between 9am-1m while he is conducting an assessment on an 8yo boy to which they have agreed and are complying with. He also brought up the group on Rideau St and advised they are not affiliated with them and are not following any direction. Marazzo advised they are aware of 2 groups of counter demonstrators planning to attend this weekend and has concerns as one of them have indicated plans to spray paint and vandalize their trucks and equipment. He advised they have already had incidents where a generator cable was cut and trucks have been vandalized.

			During the conversation Plt questioned Marazzo on his current role and was advised that all roads lead back to him and that he was involved with operations. He also indicated they have a number of doctors with them who are putting their careers at stake supporting their cause. He indicated they have a large group of lawyers involved and a large and well equipped media team that they haven't engaged yet. Marazzo advised they are receiving more supplies and resources than they can deal with and that they are renting a warehouse and will have to look into renting another. He advised they do not have an end date but an end goal. Plt discussed other convoys attending and solidarity events but Marazzo advised they are only learning details of the events through SM and do not have any contacts at this time Plt will continue to follow up with Marazzo and was invited to attend their CP at the ARC Hotel to meet face to face.

She stated she is upset with police over the narrative circulating about truckers damaging the War Memorial and Terry Fox statue. Advised that it would be police's fault if the narrative didn't change. REDA wanted police to hold joint press conferences with Freedom Convoy daily to dispel any rumours. REDA advised that would not be happening. REDA then went on to rant about PM Trudeau and how he was lying. Stated he was causing more issues by calling demonstrators racists and claiming they are committing acts of hate and violence in the media. She requested that OPS executive speak with Liberal party to have them change their narrative. REDA stated OPS should be arresting Trudeau due to him breaking numerous laws. Specifically, those on hate speech and discrimination. Felt that truckers were now an identifiable group and that Trudeau was discriminating against convoy members. She further stated that "Trudeau is the reason good people do bad things". She said this after telling me that the federal government would need to bring in the military or the UN because members of the Freedom Convoy weren't leaving until Trudeau negotiates.
